

Production Technology Solutions (PTS)

Production Technology Solutions

Kizer Energy established Production Technology Solutions (PTS) in 2007 specifically to provide specialist services to heavy oil operators globally.

PTS capabilities include:

- Reservoir Monitoring & Evaluation
- Reservoir Studies & Modeling
 - ❑ Data Capture Plan
 - ❑ Reservoir Static & Dynamic Model Development
- Reservoir Development
 - ❑ Build Well Models & Design
 - ❑ Enhanced Recovery methods & recommendations
 - ❑ Define exploitation methodology.
 - ❑ Design exploitation pilot projects.
 - ❑ Capital and Operational Cost Estimates with economic analysis.
 - ❑ Develop Integrated Drilling Plan

PTS services include:

- Heavy Oil Production Optimization Technology
- Heavy Oil Production Equipment Import and Implementation
- Well Down-Hole Instrumentation & Automation
- Project Management

“INTEVEP - the Technology Organization of Venezuelan National Oil Company PDVSA has evaluated and approved Kizer Energy production optimization technology based on Electric Heating Enhancement (EHE) for the Orinoco heavy oil belt (The ‘Faja’). We have current projects to engineer and deploy pilot installations and perform a complete assessment of the net increases in production from selected wells”.
